Stephane van der Aa

AI Data Science at BeCode
Brussels, Brussels Region, Belgium

Summary

Motivation, Vision, Faith to Believe.

Stephane is looking to find new ways to help the world by showing how we can grow the global economy through a more intelligent use of technology that aims not just at optimizing efficiencies and reducing cost but instead look at how we can create more real value for more people by combining the right motivation with vision and faith to believe in.

Books I published:

- Coding with AI: <https://amzn.eu/d/0a6rzXoJ>
- Building Secure Web Applications: <https://a.co/d/0gMWP6gO>

Scientist and Strategist (INTJ)

According to JUNG personality test this is what I am

- Introvert
- Intuitive
- Thinker
- Judger

To see the last test I took in 2015 check this link <https://archive.org/details/123-test-report-2015-11-22-16.30.18>

(Disclaimer: Despite LinkedIn being all about work, it is a social network and not just the online resumé. Therefore, just like my twitter, I sometimes use LinkedIn as my backup therapist through the simple act of expressing my thoughts. Anything I say on linkedIn is therefore therapeutic. You have the right to choose for whom else it is to be therapeutic as long as you consider its benevolent intent.)

Experience

BeCode
AI Data Science
May 2026 - Present (5 months)

Brussels

Seven intensive months, on-site. Target outcome: Data Analyst or Data Scientist.

Structure — four phases (May 2026 - Feb 2027)

The Field (1 month): Python, Git, developer tooling.

The Hill (1 month): Machine Learning, visualisation, deployment; first end-to-end "red thread" project.

The Mountain (4 months): real cases from partner companies — Cloud, Gen AI, Data Engineering.

The Summer Pastures (1 month): certifications, job prep, workshops.

Includes a 3 month company internship.

Technical coverage

Python, ML and predictive models, data visualisation, SQL and NoSQL, cloud (Azure/AWS/GCP), Power BI dashboarding, generative AI and prompt engineering, NLP and computer vision, data engineering and orchestration.

Certifications on completion - AWS Cloud Practitioner, Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900) — all entry-level cloud/AI credentials.

Target roles - Data Analyst, Data Engineer, AI Developer, Data Scientist, ML Engineer, BI Analyst, Prompt Engineer, GenAI.

Location - Gare Maritime, Tour & Taxis, Brussels (Rue Picard 11), hosted with Bruxelles Formation.

R&D

September 2020 - Present (6 years 1 month)

Brussels Metropolitan Area

New solutions and real fixes that today's world needs but no one is doing.

Based on new research in different fields.

Ones well understood we combine pieces and apply to a solution.

Analyzing and re-analyzing what already exists in the present and the past is essential as well. We study this too in house and at the same time do the

vetting. This can be like peer review later in time when more is known to recheck again.

We try to form a puzzle where there is no form yet. In learning which path can fit which piece together with another and find new paths to other, old, current and more' new pieces that make a solution better, more reliable and efficient. The result is no longer a puzzle in pieces in a box but a well understood, documented and published solution or product that is understood inside and out. We aim to be revolutionary in what we build. We aim for those magical moments when it all fits, when we become our naive inner child and feel how pieces are now one piece. A piece becomes a solution that is one step to a better world.

NGA Human Resources

19 years 1 month

Enterprise Strategy and Portfolio Director

November 2014 - October 2023 (9 years)

Global Technology Pre-Sales Director

May 2012 - October 2014 (2 years 6 months)

Working under Product Strategy and Design managing customer engagement through support of various sales and pre-sales activities and ensuring continuity beyond the sales cycle.

euHReka Engagement Director

January 2011 - July 2012 (1 year 7 months)

Brussels

Within the euHReka Product Group lead different teams for Quality Architects, Technical Writers, The Box deliverables, Demo Systems. This consolidates post software release activities in an effort to improve quality through synergy. Main mission is to support the NgA Pre-Sales and Onboarding organization.

Prior to this role I also did the design of 3 modules of euHReka Workspace (eWS):

- Document Management (DM)
- Knowledge Management (KM)
- Service Center Management (SCM - ticketing)

These modules were designed from the ground up and did not rely on underlying SAP functionality. My design work included functional design, data modeling of completely new data model to support the new modules and technical architecture.

ECM Design Lead and Product Stream Manager
January 2009 - March 2011 (2 years 3 months)

ECM Product Manager
October 2004 - January 2009 (4 years 4 months)

Fujitsu
Senior Consultant
July 1999 - December 2004 (5 years 6 months)

Education

Hogeschool Gent
Graduaat Toegepaste Informatica, Toegepaste Informatica (Applied Informatics) · (1996 - 1999)
